A BIT ABOUT ME

I have a degree in business administration, though it was highly programming focused, and I am motivated and eager to take on a wide range of tasks. I am interested in programming, graphic design, video editing, as well as working with computers and other devices.

Through my studies and hobbies, I have gained a wide range of experience in programming, video and image editing, graphic design, and working with different computers, hardware and software. Usually if someone I know has a problem with a computer or phone, they contact me.

My free time is usually spent on my own projects, playing games, or hanging out with friends.

Technology and computers have been a passion of mine since I was a kid, and that enthusiasm shows in the way I work: I'm precise, eager to learn new things and enjoy solving problems.

WORK EXPERIENCE

Game Developer (Trainee) 7/2023 – 10/2023 SuperGod

During the internship, my job was to develop a prototype of a game using the Unity game engine. I developed the prototype alone, the key part of this project was the development of Artificial Intelligence for the enemies and a helper character that would follow you and do tasks.

Web Specialist 3/2020 – 5/2021 Trapesti

My job was designing, developing and maintaining of websites using WordPress and Search Engine Optimization of an online store. I worked mainly in development, but I did also communicate with some of our customers directly.

Game Developer (Trainee) 1/2019 – 5/2019 BelleGames

During the internship, my tasks included 3D and 2D game development using the Unity game engine for Windows and Android, publishing and integrating games on Steam and Google Play.

STUDIES

Oulu University of Applied Sciences 2019 – 2023 Bachelor of Business Administration, Business Information Technology

OSAO (Vocational High School) 2016 – 2019 Vocational Qualification in Information Technology
